DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a security enclosure for a gaming machine, classified in class 312, subclass 257.1.
 - II. Claims 12-19, drawn to a method of manufacturing a door for a security enclosure for a gaming machine, classified in class 29, subclass 458.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions “security enclosure for a gaming machine” and “method of manufacturing a door for a security enclosure for a gaming machine” are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the method of manufacturing a door for a security enclosure for a gaming machine could be used to make a panel for various types of furniture.
4. A telephone call was placed to Bennet Langlotz on 27 September 2005 to request an oral election to the above restriction requirement, but the telephone number on record was disconnected or no longer in service. A written restriction request was prepared on 4 October 2005.
